

WY'EAST MEDICAL PRODUCT APPLICATION

<u>DEPARTMENT</u>	<u>TC-300</u>	<u>TL-500</u>	<u>COMMENTS</u>
Emergency	X		TC-300 Used for Procedure Chair, OB exam, ENT procedure. Also, overflow room.
Outpatient Surgery	X		TC-300 A very stable treatment chair used for many outpatient surgical procedures (ENT, Endoscopy, OB exam, Minor Surgery). CPR ready.
Critical Care		X	TL-500 Has very high clinical staff compliance to transfer patient from bed to chair to bed. Thanks to a very controlled transfer with “no lifting” and provides patient comfort and safety. Ideal for continuous ventilator patients. Can be used for intra-dept transport, <u>all with no lifting</u> .
Med/Surg		X	TL-500 Offers faster rehab. For patients to “get up” into a chair several times/day, <u>all with no lifting</u> . Also, intra-dept. transport.
Neurology		X	TL-500 Gentle controlled transfer for patients with spinal cord injuries, paralysis, Guillain-Barre syndrome, or other degenerative disabilities. Excellent for patients who must be transferred in supine position, <u>all with no lifting</u> .
Oncology		X	TL-500 Eliminates pressure on fragile tissues that often come from slings or hand transfer. Offers more comfort and much less pain during transfer. Trendelenburg position helps scalp infusion of chemotherapy infusion, <u>all with no lifting</u> .
Radiology			TTL-500 This department will see the advantage of the lateral transfer device. Especially if they are doing the transfers both on the floors and in Radiology.
Orthopedics		X	TTL-500-These patients are hard to transfer. The leg raise is also a benefit for patients with leg issues.
Lift Team		X	TL-500 When the lift team is called to put the patient in a chair; the TL-500 becomes the destination. Managing leads, tubes and ventilator lines becomes much easier during transfer, <u>all with no lifting</u> .
Burn Unit		X	TL-500 Offers very low skin shear and patient comfort. The Staph-Chek® cover is easy to clean, <u>all with no lifting</u> .
